

TRACK: LEGAL
SESSION #: L3
DATE: Monday February 4, 2008
TIME: 5:00 – 6:00PM
SESSION TITLE: "Litigation Concerns of ESI"
SPEAKER(S): Greg Freemeyer, CTO
ORGANIZATION: Norcross Group

ABSTRACT: This session is a 30,000 foot overview of the emerging proactive and early litigation activities that are occurring in today's corporate litigations as relates to ESI. These activities are typically in addition to the traditional electronic document production activities that have been identified with e-Discovery. Indeed, Electronic Discovery is becoming as multifaceted as Discovery itself. Specifically, the subjects below will be discussed:

- Corporate America's response to the new FRCP
- Litigation Triage
- Data Mapping
- Litigation Hold Culling
- Enterprise Indexing
- Cost Effective Production from backup archives
- Enterprise Document Collection
- Enterprise Forensic Tools
- Enterprise Investigative Management
- Proprietary Information and Document Sweeps (identifying and securely deleting)

SPEAKER BIO(S): Greg Freemeyer, co-founder of Norcross Group, is a Litigation Triage Solutions Specialist. He drives the technological underpinnings of the company's offerings and directs complex data collection and preservations operations for litigation support. He has submitted expert reports in federal cases and has been accepted as an expert witness in Federal Civil Court. Previously, Mr. Freemeyer served as Senior Internet Engineer on several major projects for international corporations such as Siemens and Ford Motor Company. He worked on data protection, retention and recovery solutions provided through TruStorage, Inc. Mr. Freemeyer holds multiple certifications and is an expert on storage sub-systems for Microsoft, UNIX and Linux operating systems.
